

「How To Prevent The Spread of Infectious Disease」視覺媒材文本

1. Wash your hands whenever needed thoroughly for at least 20 seconds. Use alcohol-based hand sanitizers if soap and water are not available.
2. Cover your mouth and nose when you cough or sneeze with a tissue and then throw the tissue in the bin and wash your hands or you can cough or sneeze into your elbow.
3. Wear a face mask when you go to public places or when you are staying indoors with doors or windows closed.
4. Clean and disinfect surfaces and objects that people usually touch.
5. Avoid touching your eyes, nose, and mouth with your hands unwashed.
6. Avoid close contact or going to crowded places. Always keep social distance to stay safe.

By doing the above, we are able to \_\_\_\_\_ (Please put the number from 1-6 into the box(es) that fit.

kill the pathogen	block transmission routes	keep susceptible hosts away from Covid-19
